Employment Experience

SAP Concur

12/2021 – Present – Technical Support Engineer – SAP Concur & ERP Integrations

- Resolved 2,584 technical support cases over 3.5 years (~61/month) involving SAP Concur Expense, ERP integrations, financial posting flows, and statutory requirements.
- Achieved 94% positive CSAT and maintained a 16-hour average resolution time across 980+ cases, consistently ranking among top performers.
- Recognized as regional point of reference for the Americas (Statutory team) and voted point of reference by 22 peers in the ICS team.
- Supportability ideas implemented directly into the SAP Concur product, improving diagnostic capabilities for global support teams.
- Developed internal browser extensions (ICS Tools, SQL Tools, VAT Calculator) using JavaScript, automating troubleshooting workflows for the support team.
- Authored 50+ knowledge articles and trained ICS and Statutory teams; received 130+ peer appreciations over 5 years.

Globalsys

10/2021 – 12/2021 – Database Administrator (Short-term Contract)

- Monitored 24x7 database environments for enterprise clients including Nestlé, ArcelorMittal, and Petz across SQL Server, Oracle, MySQL, MariaDB, PostgreSQL, and SAP HANA.
- Performed query tuning, optimization, and developed stored procedures, indexes, triggers, and views.
- Managed backup/restore routines, database resize activities, and environment refresh processes.

Johnson Controls – Sensormatic

10/2020 – 10/2021 – Database Administrator – SQL Server

- Administered SQL Server and PostgreSQL databases, including a 256 GB in-memory SAP HANA instance on Azure, across production, QA, and staging for Renner's RFID system (TrueVUE).
- Configured transactional replication, managed access/security, developed stored procedures and Grafana dashboards.
- Participated in production cluster migrations and collaborated with international teams in India and the US.

Henrique Stefani Transporte e Logística Ltda

04/2019 – 10/2020 – Systems Analyst (Promoted from Support)

- Promoted to Systems Analyst for technical performance; acted as interface between business users and software providers.
- Developed BI projects, Crystal Reports, and SQL reports for the Petroshow system; built web solutions using the LATROMI Framework.

W Weber Informática LTDA. (ERP Software Provider, Brazil)

09/2016 – 03/2019 – Supervisor of Technical Support / Technical Support Analyst

- Coordinated a team of 4 support technicians and 5 ERP implementation technicians; managed SLA, escalations, and team reports.
- Improved average call response time to ~20 seconds after taking over supervision; supported Weber ERP clients and developed SQL Server reports.
